WORK EXPERIENCE

Self-Employed - *Software Consultant*

August 2022 - Present / Kansas City, MO

- Provided patches and maintenance as needed for UpLift Health and Mind Ease Labs.
- Currently developing a custom website for a commercial real estate client.

Mind Ease Labs - *Software Consultant*

November 2021 - July 2022 / London, UK

- Researched and offered technical insight on analytics and email marketing tools, including GA4, AppsFlyer, SendInBlue, and MetaPixel, and integrated them into the hybrid Cordova mobile app.

UpLift Health - *Software Engineer*

October 2019 - November 2021 / Atlanta, GA

- Led in the design and development of Uplift Health iOS app.
- Built and maintained Node.js server hosted in GCP for data backup and synchronization across devices, resulting in a lower-cost, tailored alternative to Firebase.

Bettercloud - *Software Engineer*

August 2018 - September 2019 / Atlanta, GA

- Assisted in the planning and delivery of feature requests and bug fixes for legacy SaaS app built in Java, GWT, Guice, and GCP, frequently working along the full stack.

Emory University - *Application Developer/Analyst*

January 2017 - August 2018 / Atlanta, GA

- Designed and delivered a web app solution for visualizing assay data using Python for data processing and the open source LabKey as a front-end.
- Assisted with integrating campus IT departments using an in-house Java pub/sub framework.

AT&T - *Software Engineer*

August 2015 - December 2016 / Atlanta, GA

- Updated ETL pipeline logic for Java middleware applications assigned to me and provided bug fixes, technical support, and knowledge transfers.

Sagepath - *Technical Developer*

May 2014 - August 2015 / Atlanta, GA

- Took on web development contracts from clients as assigned, which included a Drupal site for Duke University and an Android app for Buffalo Wild Wings.
